

Meet our intelligent & inclusive  
transport solution.

The Connect Carrier Cargo by Roam

## Sustainable and inclusive.

**The delivery market must become more sustainable and inclusive. Due to the tight labor market, it is important that companies look at what someone still can contribute to that market.**

How can we help a specific target group find a job as for example postal worker? Is it possible to prepare a wheelchair user for a job as a bicycle deliverer? Of course it is!

Roam creates mobility solutions for this specific target group. Inclusivity is becoming an increasingly important theme, in which companies play a major role.

Delivering mails and packages

with the wheelchair.

**The Connect Carrier Cargo is the electrically connectable cargo bike, for the wheelchair.**

Roam creates mobility solutions for people who are wheelchair dependent. With the Connect Carrier Cargo, companies can create a new mobility solution for the business delivery market.

A man in a wheelchair is riding a white cargo bike on a cobblestone street in a European town. The street is lined with historic buildings, and a church spire is visible in the distance. The scene is captured in warm, golden light, suggesting late afternoon or early morning. A yellow circle on the right side of the image contains text.

Connect  
Carrier Cargo

Our intelligent  
and inclusive  
carrier solution

## Full electric.

**The Connect Carrier Cargo easily connects to the wheelchair using the custom-made Roam adapter. This is placed on the wheelchair frame under the seat. Strong, safe and the user is always assured of his/her correct sitting position.**

The Connect Carrier Cargo has:

- Drive by 2 electric motors in both wheels
- Throttle control
- Dual hydraulic disc brakes
- LED Lighting and brake lights
- Reverse function
- Optional: Roam Fleet Management
- Optional: customized company colours

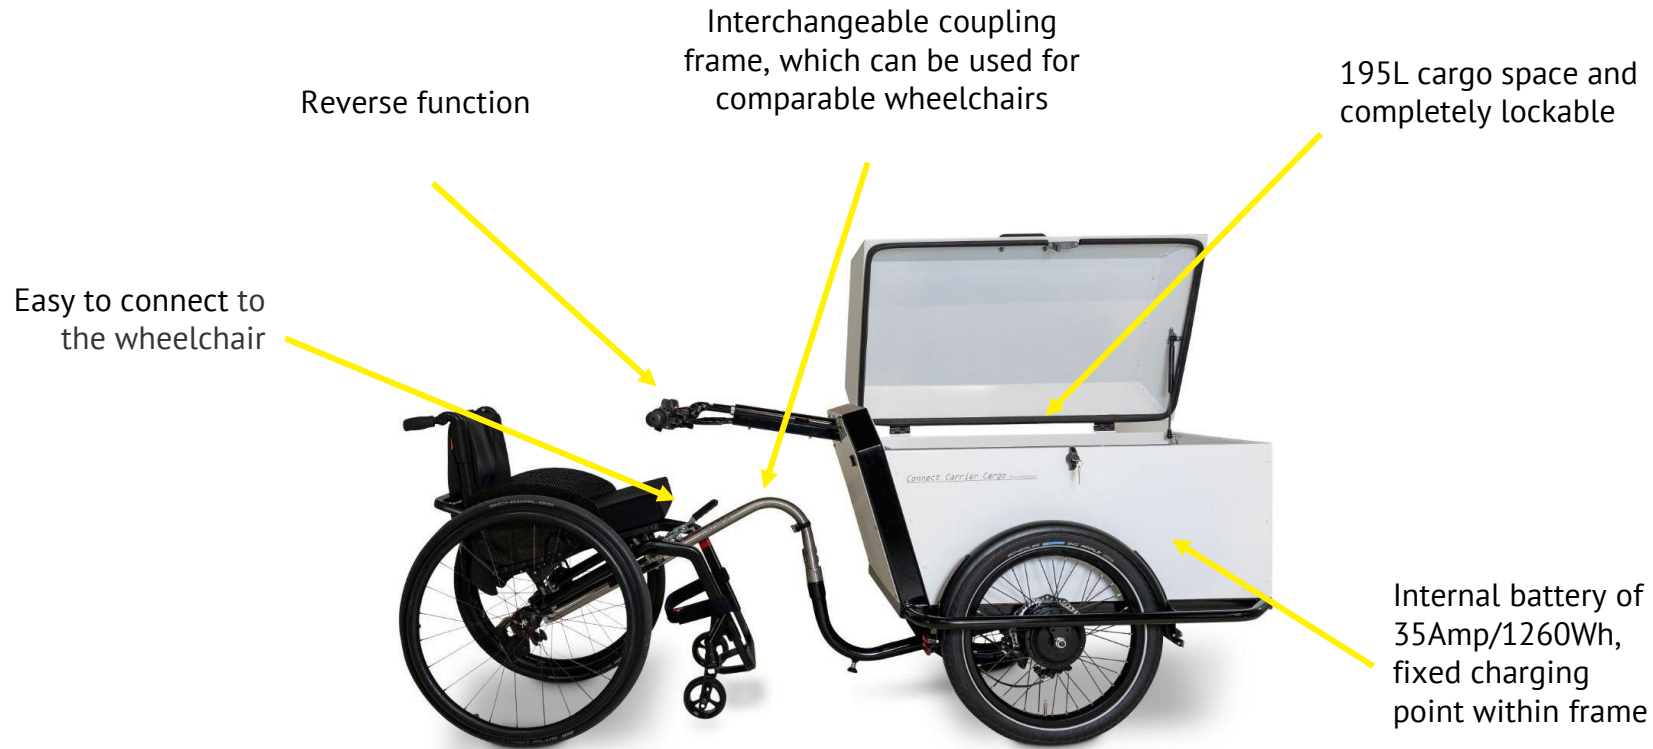

Easy to connect  
by using the  
Roam adapter

## Large cargo space.

The Connect Carrier Cargo is equipped with a lockable aluminum box that has 195L loading capacity, up to a maximum loading weight of 50 kg.

195 litre  
Cargo space  
—————  
max 50 kg

Top speed: 18 km/h | Range: 40/60 km | Lighting: front, rear and brake lights

## Who we are...

**Roam Carrier Solutions B.V. has been creating custom-made bicycles for people with physical disabilities since 1979.**

The bicycles are manufactured entirely in the Netherlands. We can respond very well to the specific wishes of our customers.
